

CONNECTING **STUDENT TEACHERS** WITH GLOBAL PRACTITIONERS

A Safe, Inclusive and Meaningful Online Community
To Empower Student Teachers

OUR VISION

A social, global and collaborative learning platform

We believe that one of the most impactful ways to improve Education in the world is to focus on **building capacity in teachers** and improving their wellbeing, competencies and motivation.

TeacherWit is committed to creating a global community that facilitates interactions and collaborations between educators and the diffusion of inspiring educational resources in a safe, welcoming and authentic environment.

On LinkedIn, teachers share with thousands of people they don't know. On Facebook, they share with a limited circle of friends.

On **TeacherWit**, they connect with educators who share the same interests!

“The most valuable resource that all teachers have is each other. Without collaboration, our growth is limited to our own perspectives.”

Robert John Meehan

Make every student teacher learn and grow as an educator

- ✔ - Have an **exclusive group** for all your student teachers, alumni and faculty
- ✔ - Make your student teachers consider **new perspectives and different ideas** by connecting with educators from 50+ countries they would certainly never meet.
- ✔ - **Attract** new student teachers and **motivate** existing ones by offering them a modern and meaningful tool.
- ✔ - **Empower** your student teachers by giving them access to a variety of resources to implement the most effective practices.
- ✔ - Build a positive, innovative and caring **culture** in your department.
- ✔ - Enhance **the quality of your program** by supporting student teacher well-being and professional learning.
- ✔ - Set the tone for **continual and sustained collaboration** within Professional Learning Communities as an essential practice.

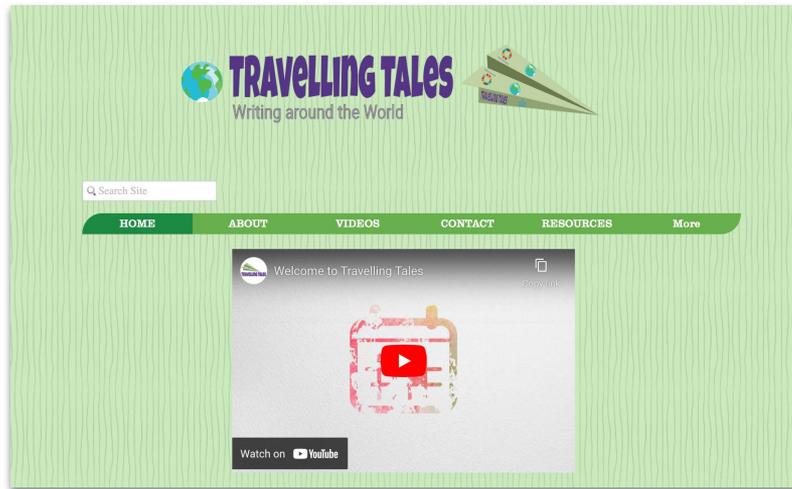

OUR VISION

Opening new learning possibilities

When you are part of a global community, you can build relationships and collaborate with teachers who are located in a different country to design unique learning experiences for students and understand multiple perspectives of the world.

Here is an example of a global project around the SDGs developed by Joel Bevans, one of our members.

The Heart of the Ocean - A Travelling Tale created by students from New Zealand, Switzerland, Japan and Luxembourg

Well-Being, Diversity + Collaborative Learning = TeacherWit

WHY SHOULD STUDENT TEACHERS JOIN?

An inspiring community to socialize and learn

Some of the most inspiring educators are on **TeacherWit**. Not only can teachers **socialize** but they also have access to a **valuable library of past and live learning opportunities** at the same time and at no extra cost.

WHY SHOULD EDUCATORS JOIN?

Building capacity for one another

Together, we leverage the power of the community to improve Education!

By joining **TeacherWit**, you get access to useful educational resources and benefit from the experience of many educators across the globe so that you can learn from and with your peers. It is an opportunity to belong to a **community** of like-minded educators. TeacherWit is a **safe and teacher wellbeing-oriented environment where members** share their own stories, anecdotes, comments, strategies and resources. They can also find **partners to collaborate** on local or global projects and attend live sessions with **inspirational guest speakers**.

WHY SHOULD STUDENT TEACHERS JOIN?

Many resources on a variety of topics

Educators have access to a variety of resources organized in 40+ **topics**. Each post is tagged so that everything is **easily searchable**.

TOPIC

Inclusion, Diversity and Equity

Resources to help educators understand, promote and take action around these extremely important topics.

TEACHER LAB: Your Strategies and Tips
When teachers share their experiences, they very often recall anecdotes and strategies that they learned "by doing"...

UNIVERSITY PRIVATE GROUPS

A welcoming, safe and inspiring place, only for your students

Your Department can have a total **ownership** of one private group where you can create your own topics and enroll an unlimited number of student teachers. You can offer your students both a window to the world and a safe and private corner at the same time.

Groups are private spaces that provide organizations with a **personalized** and effective way to communicate with their members, share specific resources, organize live events and develop their own topics. **Group members** can participate in discussions, connect with others, share ideas, questions and resources. Your student teachers feel like they belong to the community, which will increase both their wellbeing and motivation. They also have access to the global platform and educators from all around the world.

The screenshot shows a private group card with a dark blue circular profile picture containing a white 'u'. Below the profile picture is a grey lock icon and the word 'SECRET'. To the right of the profile picture, the group name 'University Student Teachers' is displayed in bold. Below the name is the description 'A private group for all student teachers of our University.' and the status '1 Member · Last Active now'. In the top right corner of the card, the word 'Host' is followed by a crown icon.

TeacherWit

EVERYONE

UNIVERSITY

Membership - Can join for free

App - Download for free

Connection - Connect with other educators from all around the world to exchange ideas, resources and practices

Discussions - Access and participate in Topic discussions

Resources - Access resources shared in Topic threads

Webinars and Live Events - Attend inspiring webinars from a selection of prestigious guest speakers and other live events.

Regional and Group-Specific Webinars and Live Events

Private Groups- Restricted membership with their own topics, live events and chats : e.g. University, School District or School.

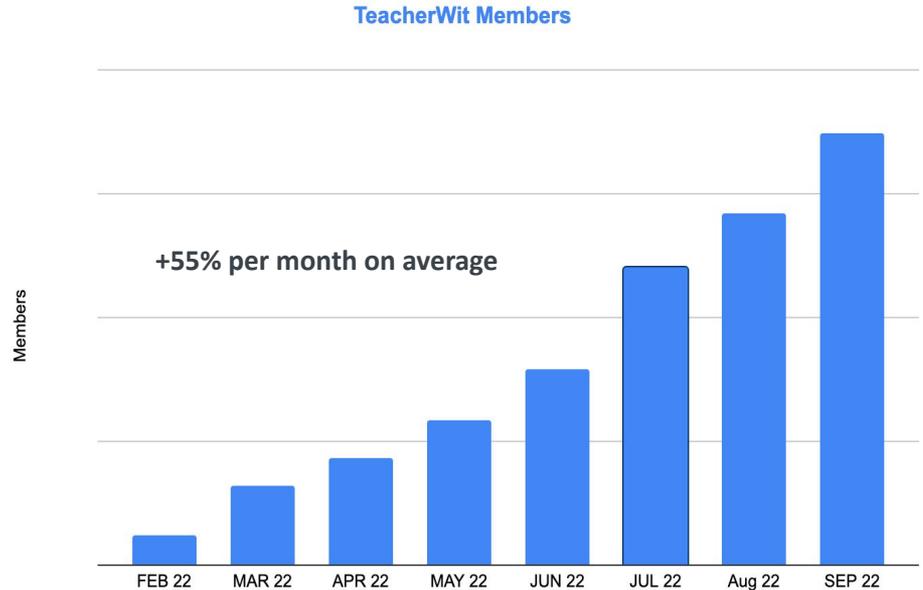

OUR COMMUNITY

A fast-growing community of educators from 48 countries

Since its launch in February 2022, TeacherWit has experienced a 55% monthly increase in the number of users.

Members are from 48 countries, and teach all subjects and grade levels.

While most members are teachers, we also have some authors, education consultants, edutech specialists, researchers and school leaders.

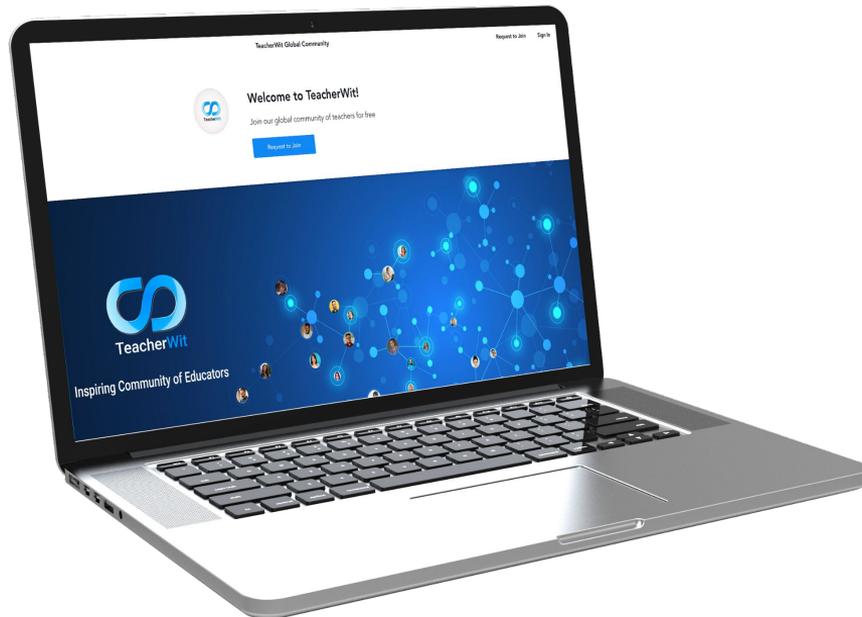

HOW DOES IT WORK?

Easy access on all devices with your University email

The Community platform is available on any web browser at teacherwit.com

TeacherWit is also available as an **App** on Android, Apple Store and Google Play.

OUR STORY

An Education Organization Committed to Improving Education

TeacherWit is the newest entity of a larger Canadian group of companies in education that has been operating for several years. This group includes well-established companies like Digital Media Academy which was founded in 1999 on the campus of Stanford University to provide technology education to K12 teachers and develop technology immersion courses for students.

TeacherWit was originally developed by International Canadian Academy (ICA) to meet the needs of their network of schools around the globe. Our dedicated online professional learning community for educators offers significant impact on continual teacher and administrator development, especially when designed to be flexible and customizable to both private groups for schools and districts, as well as open to all educators.

TeacherWit is the result of this successful experience, combined with an immovable commitment to reshape education.
